Subject: RE: SDDL meeting notes

Hello Leslie/Maddie –

As Leslie mentioned on the call today, official meeting minutes were not generated. As I recall, CRA had a PowerPoint presentation so I ended up taking very few notes. Bulleted below are what few notations I made:

- [REDACTED] CRA stated that they are not investigating groundwater per se, but to find out what other remedies they need to evaluate.
- [REDACTED] They will do source area and perimeter investigations concurrently.
- [REDACTED] Laura Marshall brought up the data gap of where the transformers were dumped.
- [REDACTED] CRA was not going to do temporal assessments of groundwater contaminants, but would now consider it.
- [REDACTED] CRA proposed background studies for arsenic, PAH's and possibly other constituents.
- [REDACTED] Question arose if the fill in OU2 to the south is still considered part of the landfill.
- [REDACTED] The rest of the discussion focused on the overall project schedule.

Please let me know if you need anything else.

Thank you.

Subject: SDDL meeting notes

Brett, do you have any notes from our Jan. 23, 2013 meeting with CRA that you can share with Maddie?

Leslie Patterson
